Technical Information

JackHammer Graffiti-Ink-Adhesive Remover 6800 contains 100% environmentally safe, renewable, readily biodegradable components. This product is designed to be part of a "Green" environmentally friendly maintenance program.

PHYSICAL PROPERTIES:

Appearance:	Liquid
Odor:	Mild Citrus
Boiling Point:	>292° F
Solubility in Water:	25% Soluble
Ph:	7.3
Color:	Clear-Water White
Evaporation Rate:	0.36

PRODUCT EFFECTIVENESS:

The effectiveness of this product and the "speed" at which it works is determined by certain factors. In general these factors are as follows:
TEMPERATURE: The warmer the temperature, the faster this product will work. The effective operating temperature is between 55° F. & 120° F.
AGITATION: The use of an agitation with rag, brush or abrasive sponge speeds the process.
TYPE OF STAIN: Some paints, inks & adhesives take longer than others.
 It has been our experience that the "solvent" action of this product begins immediately. The longer the product is allowed to remain on the contaminant, the better the result.
